

# CPSC 304 Project Cover Page

Milestone #: 4

Date: Dec 3, 2023

Group Number: 150

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
asar	75185298	H3u8k	asar@asarmichil.com
arden	12549432	C3a2t	general@ardensinclair.com
crystal	99260986	s5x5a	parvenucrystal@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

## Project description

Event Calendar:

An app that works as a platform within the events and entertainment industry, allowing organizers to host events with details, categories, and tickets, while attendees / guests can browse / filter events, buy tickets, and leave reviews.

Changes to schema:

- Users table renamed to account table, with first\_name and last\_name removed as Kinde our authentication provider stored those in its own database and keeping consistency with both could introduce bugs (names can still be fetched however!).
- Organization\_name in organizer is now a varchar instead of text type
- Some venue types changed from text to varchar
- Events have a file\_id but we did not end up using it yet
- Ticket auto default generates a random uuid now

SQL schema (also found in deliverables directory):

```
DROP TABLE IF EXISTS review;

DROP TABLE IF EXISTS discounted_ticket;

DROP TABLE IF EXISTS ticket;

## Before

## During

A screenshot of the "Create an Event" form in the "event-calendar-kappa.vercel.app" application. The form is titled "Create an Event" and contains several input fields and buttons. The "Venue" section has a text input for "Grand Arena" with the address "123 Main Street, Vancouver, BC V6T1Z4" and a button "Choose a different venue". The "Name" section has a text input for "Milestone 4". The "Description" section has a text area with the text "This is an insert query into the event table that also affects the ticket and event\_in\_category tables." The "Number of tickets" section has a text input for "20". The "Ticket price" section has a text input for "15.00". The "Start date" section has a date input for "2023-12-03" with a calendar icon. The "End date" section has a date input for "2023-12-03" with a calendar icon. The application has navigation links (back, forward, refresh) and a toggle for a calendar view.

## After

## Startup Pitch Day

### Entrepreneurs pitch their innovative ideas

#### Milestone 4
